Robbie,

The City of Bremen just completed the third yearly water meter testing program through Johnson Controls and please let me thank you and your staff for the replacement of approximately 100 water meters without any problems.

Approximately four years ago when the City began its city wide water meter replacement update from hand reads to an AMR system, we did not have the knowledge or personnel to complete this project. You presented your program to replace approximately 2,700 backflows and water meters and provide the IT support for the program. After reviewing other options, we decided on your company for replacement and service. I want to thank your staff, especially Project Manager Johnny Burgess and IT Project Manager Rob Jukes for their professional job but especially for their continual support. This project was completed as scheduled without major issues. In addition to, your staff has continued to assist us by providing support beyond the terms of the project. While I know that other companies are in the same business as you, I can not imagine that their service would surpassed yours.

I appreciate what you staff did for the City and look forward to a continual relationship with your company. My regards go to Donnie and you for a prosperous 2009.

Sincerely,

Mike Thompson
Operations Manager
